A wide range of consistent test charts for testing physical properties of coating, lacquers and inks. Suitable for determining hiding power, opacity and spreading rate. They come in a variety of dimensions from DIN A6 up to and including DIN A4. All charts are film laminated for an excellent solvent and chemical resistance and an even film spread. On each chart there is a section for filling out the date, time and test number.

Business

Coating Laboratories, Paint Production

Standards

Look up the appropriate standard for a correct execution of the test.

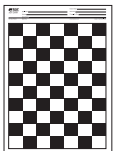

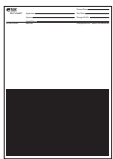

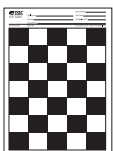

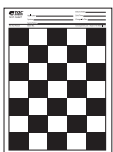

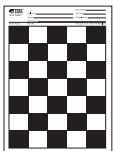

Feature

- Excellent solvent
- Chemical resistant
- Even film spread
- Note section

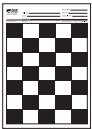

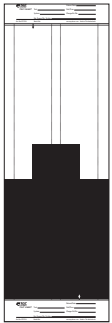

Scope of supply

- TQC test charts, box 100/250 pcs (depending on model)
- Certificate (only available for charts with optical brightener).
